DETAILED ACTION

Allowable Subject Matter

1. Claims 1-15 are allowed.
2. The following is an examiner's statement of reasons for allowance: the claims are allowed because the best prior art of record (see the cited references), which is either considered alone or in combination, fails to teach or fairly suggest an analog-to-digital converter that includes, among other unique features, a timer circuit that starts calculating the charging period of time when the first switch electrically connects the current source to the capacitor for charging the capacitor and stops calculating the charging period of time when the comparator outputs the first comparison value. The prior art also fails to teach a method of converting an analog voltage into a digital voltage that includes, among other steps, steps of calculating a charging period of time from when the current begins flowing through the capacitor until when the analog input voltage and the voltage across the capacitor satisfy the predetermined relationship; and converting the charging period of time into a digital output voltage.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
